PROJECTS

- **RFID based Attendance and Door Locking System**
  Used RFID Technology to make a System that prevents anyone to pass by a Door without marking attendance. As soon as the RFID card is scanned the door opens and attendance of the person is sent to a google sheet using WIFI.

- **Rent a Car System**
  Concepts learnt from Object Oriented Programming and Database Systems were utilized to make a utility software for a Rent a Car Business. Technologies Used were JAVA, SQL and connected them using JDBC.

- **Grocery Store**
  Designed a basic grocery store using C++ and Concepts from Programming fundamentals.
